

Statement of Ed Martin Regarding Russ Carnahan's "Jobs Summit" at Washington University

"Russ Carnahan wants to talk about jobs? In the last year, Carnahan has voted for a "stimulus" bill that fed money to special interests and failed to create a significant number of jobs in Missouri, a "cap-and-trade" energy tax bill that will devastate businesses in our region, and a trillion dollar government takeover of health care that will hurt workers and our economy. Maybe Congressman Carnahan should stop his globe-trotting travel paid for by taxpayers and special interests and focus on what Missourians really need: more money in their pockets and a better climate for businesses in our region."
